

Semi-Synthetic 2-Cycle Oil

DESCRIPTION:

Olympic Petroleum's Semi-Synthetic 2-Cycle Oil is formulated with high quality base stocks, synthetic lubricants, and a multi-functional additive package for moderate to severe applications. This product is designed for use in heavy duty air-cooled gasoline engines such as mopeds, motorcycles, and snowmobiles. Additional applications include: chain saws, lawn mowers, and lawn trimmers.

QUALITIES:

- * Provides excellent lubrication along cylinder walls and protection against exhaust system blockage
- * Provides protection against high temperature ring sticking and piston scuffing
- * Reduces combination chamber and piston deposits
- * Provides protection against rust and corrosion
- * Low smoke

SPECIFICATIONS: Meets or Exceeds Performance Level

- * JASO FD, ISO-L-EGD
- * API TC

TYPICAL PROPERTIES:

Test	Test Method	Semi-Synthetic 2-Cycle Oil
Color	Visual	Green
Gravity, °API	ASTM D4052	32.8
Specific Gravity @15.56°C	ASTM D4052	0.86
Viscosity @100°C, cSt	ASTM D445	6.9
Flash Point, °C	ASTM D92	170
Calcium, mass%	ASTM D4927	0.039
